Legislative Action! Help Protect Nursing Home Residents & Caregivers

The Florida Legislature is considering legislation that will improve the quality of care in Florida nursing homes by requiring that a minimum amount of taxpayer funded Medicaid dollars be spent on patient care and adequate staffing.

HB 1237 and SB 1596 will also do the following:

- Increase and **improve fiscal and operational transparency** for nursing home facilities that receive taxpayer-funded Medicaid program dollars.
- Establish a 15% expense **cap** on Medicaid expenditures for **executive and managerial salaries** to increase transparency regarding nursing home facility administrative costs.
- Require nursing homes to use **audited financial statements** for all financial reporting, as is currently required by hospitals and other health facilities.

Call now and tell your legislator to **VOTE YES** on bills HB 1237 & SB 1596 so we can ensure more of our taxpayer dollars go to bedside care and staffing, not CEOs.
